ZENSO ERGO-LINE
relax chair collection

ZENSO ERGO-LINE

advantages

01. ERGO-LINE RELAX

Comfortable for the user

The continuously adjustable Ergo-line relax mechanism reduces the number of pressure points on the body and improves the blood circulation. This mechanism is activated by means of an ergonomic lever on the right side.

02. COMBINATION SEAT HEIGHT / SEAT DEPTH

Custom-made

The ZenSo Ergo-line chair is available in three different seat heights (42,5 cm / 45 cm / 47,5 cm) and two seat depths (46 cm or 50 cm). Thanks to this range, a suitable Zenso chair is available for any user, irrespective of the figure.

03. TELESCOPIC LEGREST

Optimum support

The legrest is lengthened by 70 mm when inclined. Thanks to this function, the legs are optimally supported. It also eliminates wrinkles near or in the hollow of the knee that could further develop into decubitus.

04. REMOVABLE SEAT

Maintenance-friendly

The seat and legrest can be removed as a whole, so that the chair and seat can be properly cleaned. Furthermore, the underside of the seat and legrest is fully upholstered.

05. RAISING & SITTING ASSIST

Getting up and sitting safely

This chair can be optionally equipped with a raising & sitting assist that can be easily activated by means of an additional lever. The supporting seat movement makes both getting up and sitting easier.

06. HIGH LEVEL OF FINISHING

Quality and user-friendly

Fully upholstered seat and legrest, including the underside. High level of finishing, thanks to double stitching. There are no zips or staples, which makes cleaning easier.

07. CENTRAL BRAKE

Activation in one single movement

The chair is highly manoeuvrable and mobile. The two castors in front are equipped with a central directional brake and can be smoothly activated by means of an ergonomic brake pedal.

08. DOUBLE CASTORS

Better manoeuvrability

The Tente twin castors Ø 100 mm offer an unequalled manoeuvrability, thanks to the extremely low rolling and swivel resistance.

09. MODULAR

In accordance with your wishes and needs

The relax chair can be built in accordance with your wish. Several accessories complete the chair, such as a removable headrest, an IV rod, a dinner tray, neck cushion,...

10. FIRE-RETARDANT

Upholstery and foam

The foam is standard fire-retardant to the core and offers optimum fire safety, even when the upholstery is damaged.

11. ERGONOMICS

Push bar and directional castor

When a central brake is opted for, the directional castors are installed in front, so that less force is needed to manoeuvre the chair. The oval shape of the push bar guarantees optimum tactility.

12. UNIVERSAL COMFORT

Optimum support

The shape of the backrest supports the lower back, shoulders and head exceptionally, so that an additional neck cushion is not necessary.
