

# St Elisabeth Hospital

Zottegem (Belgium)

The AZ Sint-Elisabeth at Zottegem is currently undergoing a metamorphosis. Not only are there refurbishments taking place on the intensive care, medium care and geriatrics' departments of the existing hospital, there is also a brand new wing being built, which will contain not only an oncology department, but also a surgery department and geriatrics outpatients hospital.

The new outpatient hospital chose our brand new Aron+ day surgery stretcher. The stretcher offers the same comfort as a traditional hospital bed. Thanks to its narrowed patient platform, the stretcher is ideal for use in outpatient hospitals where frequent relocations are commonplace.

**Architect:** Boeckx ([www.boeckx.be](http://www.boeckx.be))

**Scope of the project :** 70 rooms

**Date:** Autumn 2015
